Head Protection

**BECAUSE A HARD HEAD
IS A CHARACTER FLAW,
NOT A PIECE OF
SAFETY EQUIPMENT**

TRAX

Our hard hats are the perfect balance between function and form. We modified the structural design to redefine what a hard hat should be. All of our hard hats are put through extensive testing and proven to provide maximum head protection and to reduce head trauma.

- 1** Shell - Made from carbon fiber; an ultra-light material able to withstand heavy impacts.
- 2** EXO Dome - This innovative internal liner is made from high impact EPS composite to better absorb and disperses impact forces.
- 3** Comfort Pad - This liner is dual purpose to provide true comfort and an additional impact absorption layer.
- 4** LUX Suspension - secures the hardhat to your head and mitigates unwanted movement.

LUX SUSPENSION SYSTEM

- 1** Brow Pad - a leather pad that wicks sweat, keeping you cool and dry
- 2** Pivot System - allows the cinch fit system to pivot vertically providing a secure fit for all head shapes and sizes
- 3** Cinch Fit - allows you to easily tighten the helmet to your preference

EXO DOME ABSORBS IMPACT

Built from the DNA of a motorcycle racing helmet, the Exo Dome is an impact absorbing liner made from EPS foam. This liner serves to absorb impact forces while at the same time providing a more comfortable fit than a traditional hardhat.

■ TRAX CARBON NEW

- **Shell** – Made from carbon fiber; a ultralight material able to withstand heavy impacts.
- **Internal Liner** – Utilizes a high impact EPS composite called the EXO Dome. The same material used to protect motorcyclist against high speed impacts. We modified it to better fit the industrial world by providing enhanced impact absorption and better protect against a flying projectile.
- **Padding** – The Comfort Pad is a soft pliable layer that sits between the EXO Dome and your head to provide true comfort and all day use.
- **Retention System** – Using a uniquely designed LUX System to provide better retention. The ratcheting fitment dial allows for rapid head size adjustment and is easy to grip and manipulate with gloves on. The ratcheting system lies on the occipital lobe, providing stability and comfort.
- **Brim Grip** – A staple feature on all our premium hard hats is designed to provide a better grip.
- **Brow Pad** – Synthetic leather is durable and provides better sweat absorption than standard brow pads.

DAX CARBON

- **Shell** – Made from carbon fiber; a lighter material able to withstand heavier impacts.
- **Internal Liner** – Using a six-point suspension system to provide superior impact absorption
- **Padding** – Perforated Clarino® synthetic leather comfort dome with molded EVA foam insert for additional shock absorbing protection to the top of head
- **Retention System** – Using our uniquely designed LUX Suspension System to provide better retention. The ratcheting fitment dial allows for rapid head size adjustment and is easy to grip and manipulate with gloves on. The ratcheting system lies on the occipital lobe, providing stability and comfort.
- **Brim Grip** – A staple feature on all our premium hard hats is designed to provide a better grip.
- **Brow Pad** – Synthetic leather is durable and provides better sweat absorption than standard brow pads.

A large, vibrant yellow brushstroke graphic is the central focus, set against a background of light-colored wood. The brushstroke has a textured, painterly appearance with some darker yellow and brown tones at the edges, suggesting it was applied with a brush. The background shows the grain of the wood and some blurred architectural elements, possibly a window or door frame, in a warm, natural light setting.

Eye Wear

**PROTECTION YOU
CAN SEE**

SONIC

The worksite is filled with potential hazards. Stay vigilant and alert with our field tested eyewear. Remain confident knowing our eyewear is put through the wringer to ensure optimum protection from the sun, debris, projectiles and drops.

AMOUNT OF SUNLIGHT

TR-90 FLEX FRAME

Durable, light, and flexible, the TR-90 Flex Frame is strong enough to hold up to the most extreme abuse.

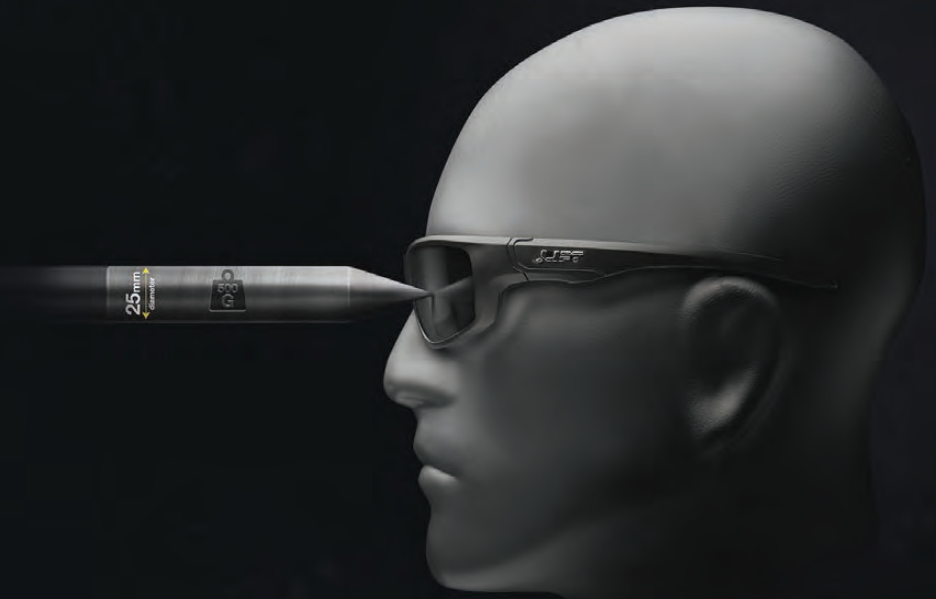

HIGH VELOCITY TESTING

Simulates particles that would be encountered in grinding, chipping, machining or similar operations. This is tested in a controlled environment by propelling a 1.04 gram steel ball directly at the lenses at 150 FPS. While under the distress of testing the lens must stay in the frame and not crack or fracture in any way.

HIGH IMPACT TESTING

Simulates a blow from a tool that might slip from the work surface or when the lens collides with a stationary object. This is tested in a controlled environment by dropping a 500 gram projectile from 50in/127cm. While under the distress of testing the lens must stay in the frame and not crack or fracture in any way.

SONIC

- Small to medium profile fit

It has a textured, painterly appearance with some darker yellow and brownish streaks, suggesting it was applied with a brush. The background is a blurred wooden interior, possibly a workshop or a barn, with wooden beams and a window showing a bright outdoor scene.

Gloves

**A HANDY PIECE OF
EQUIPMENT**

PRO SERIES

TACKER

Pro Series Gloves are designed and engineered to be task specific in nature. There are options ideal for general purpose to industry specific labor. High quality materials and form fitting construction ensure extended use and easy operation.

1 TPR Knuckle Guard - Enhanced finger coverage for added protection

2 Perforated Leather - Perforated genuine leather provides rugged strength and breathability

3 Touch Screen Finger Tip - Coated with advanced touch conductive material to enable you to flawlessly manipulate a touch screen device

4 TPR Strap Closure - Velcro TPR closure for a secure fit

5 Leather EVA Padded Palm- Made to protect you from rough surfaces and other hazardous elements

TACKER

The Tacker glove is made from heavy-duty genuine leather and designed for superior abrasion resistance.

- Genuine leather reinforcements on the palm, saddle, fourchettes and fingertips for impact and vibration absorption
- EVA padded palm for impact and vibration absorption
- TPR knuckle impact protection
- Embossed airprene comfort cuff
- Touch screen finger tip
- Machine washable genuine leather for maximum abrasion resistance
- TPR wrist closure

CUT RESISTANT

FIBERWIRE NITRILE IMPACT

Our cut gloves are made from interlocking cut resistance fibers. Built to protect your hands from sharp objects without limiting dexterity and breathability.

1 TPR - Full finger knuckle and metacarpal impact and crush protection

2 Fiberwire Shell - 360° cut level 5 Fiberwire™ 13 Ga. shell: High-density polyethylene (HDPE) & glass fiber

3 Double dipped sandy nitrile palm provides a superior grip and is chemical and caustic substance resistant

FIBERWIRE A5 IMPACT CRINKLE LATEX

NEW

- 360 degree FiberWire™ cut level A5 with a 15 gauge shell: High Density Polyethylene (HDPE) & glass fiber
- Full finger, knuckle and metacarpal TPR impact and crush protection
- Latex crinkle dipped palm provides a superior grip in wet or dry conditions

Knee Pads

**LET'S GET KNEE DEEP
IN PROTECTION**

APEX GEL

Our most popular knee pad is designed to provide traction and plush comfort on your knees.

1 TPR - Knee cap maximizes traction and stability on all surfaces

2 Apex Gel - Insert forms to patella and knee cap, maximizing stabilization and protection

3 Ballistic Nylon - construction resists abrasion for increased durability

4 Two Strap Design - fully adjustable for any knee

APEX GEL KNEE PAD

- Hinged upper support strap is removable and prevents binding
- Fully adjustable two strap design resists slipping
- Textured TPR knee cap maximizes traction and stability on all surfaces
- Internal gel insert forms to patella and knee cap, maximizing stabilization and protection
- Ballistic nylon construction resists abrasion for increased durability
- Designed to prevent "roll-off" on hard surfaces
- One size fits most

CRAWLER

The Crawler rolling tool bag features a heavy-duty telescoping handle and wheels for easy maneuvering and mobility, a perfect construction site companion.

- 1** 30 Storage Pockets – not all jobs are the same, the Crawler is designed to be versatile and can store a wide range of tools
- 2** Heavy-Duty telescoping handle – this durable handle extends 39" from the ground allowing the bag to be rolled easily
- 3** Tablet Compartment – fits a large tablet
- 4** Ballistic Nylon – this heavy duty material is water-resistant and built tough enough to handle the abuse of a jobsite
- 5** Two-Wheel Casters – allows for smooth and reliable transportation from one worksite to the next.

CRAWLER **NEW** ROLLING TOOL BAG

Crawler Rolling tool bag features a heavy-duty telescoping handle and wheels for easy maneuvering and mobility. A perfect construction site companion.

- Large main compartment allows easy access to tools, providing 13 pockets and 1 smart tablet compartment.
- 15 external compartments, 1 large compartment with heavy duty zipper.
- Reinforced hard molded top for added durability.
- Heavy duty nylon water-resistant construction.

10' X 10' HI-VIZ CANOPY

Style and portability meet with the new LIFT Safety recreational canopy. Along with a modern design, this 10' x 10' shelter is built with the newest in technology and materials. The shelter has a clear-span center for increased headroom, high-strength end caps, improved pull pin quick lock release, three height options, and reinforced Velcro fabric corners. Our LIFT Safety canopy comes with an upgraded roller bag.

- Clear-Span center provides increased headroom
- Heavy duty footpads for stakes
- Velcro edging for backdrop attachment
- Easy slide pull pin for quick lock release
- Truss washers provide increased stability and easy set up
- High-Strength end caps for greater durability
- Reinforced fabric top corners provide greater durability
- Leg toggles provide three levels of height

CUSTOM FORCE WE'LL DESIGN FOR YOU

DO YOU HAVE A PRODUCT IDEA?

We provide access to our product development lab to co-develop a product that 100% meets your needs: YOUR idea, OUR developers, and with the legendary LIFT quality built in from the start, so it'll last past the finish.

ABOUT THE LAB

LIFT Custom Force is a product problem-solver that enables you to come up with a custom solution to your specific safety product needs. Do you need a glove that performs better than anything currently available for your specific application or do you need a protective eyewear that is comfortable, but has a unique feature that you haven't found yet in the market?

HOW THE PROGRAM GOT STARTED

Backed by over 30 years of safety innovation, LIFT is proud to announce it's Custom Force program.

In October of 2006 Lift Safety was approached by Precision Drilling to design and develop a glove that would reduce or potentially eliminate one of the more common work related injuries...HAND and FINGER INJURIES. Over the course of 16 months, a series of prototypes, and more than 25,000 hours of field testing resulted in a glove that went beyond Precision Drilling's expectations. In July 2008 Precision Drilling received their first production shipment and implemented the Rigger Glove into their safety program.

ARE YOU INTERESTED?

Ask your LIFT Safety team member for more information.

In 1985 two gentlemen developed a strategy that would forever change and revolutionize the sport of motocross. Over the last quarter of a century EVS Sports has become the leader in innovation and advanced technology, developing head to toe products for the majority of today's extreme sports athletes. What started out as one knee brace has evolved into an extensive line of knees braces, neck supports, helmets, chest/back protection and a long list of protective gear products to keep any athlete safe when doing what they love. We pour the same amount of dedication and determination into our products as you do into becoming the best that you can possibly be.

**PROTECTING TODAY,
BUILDING FOR TOMORROW.**
